

# TS-1

INBAIL TEAT SPRAY  
ROTARY SHEDS

## LOOKING FOR AN INBAIL TEAT SPRAY?

The MilktechNZ TS-1 is an automatic in bail post teat spraying system designed specifically for rotary platforms.

The TS-1 system is designed for teat spraying immediately after the milking process, allowing for maximum coverage, ensuring optimum udder health, while reducing labour requirements and peace of mind.

- Saves labour and avoids operator errors
- Control timings and teat spray volumes through your smart device
- Designed to allow the operator optimum cluster attachment
- High quality materials to suit all teat spray types
- Immediate protection of the teat, ensuring excellent animal health
- 100% design and manufactured in NZ
