

MILKING CLAW

FOR HERRINGBONE AND
ROTARY SHEDS

LOOKING FOR A BETTER MILKING CLAW?

The MilktechNZ® MC-1 is a high capacity milking claw designed for today's high producing cows. Developed to provide excellent vacuum stability with the advantage of handling high milk flow ensuring a gentle and fast milking process.

- High capacity 375ml claw for optimum vacuum stability.
- More robust bowl made from Polyphenylsulfone – one of the strongest, most chemically resistant polymers available.
- Available in 2+2 or 4+0 pulsation types.
- Carefully designed to hang in the optimum position for cupping.
- Air admission hole can be placed front or back to allow quick inspection and cleaning.
- 100% designed and manufactured in New Zealand.
