

CLEVER PULSATOR

FOR HERRINGBONE AND
ROTARY SHEDS

LOOKING FOR PULSATORS?

The MilktechNZ® P-1 pulsator has been designed with reliability and milking performance front of mind. Clever design ensure every pulsator performs to the same accurate standard every milking across all machine types.

Configurable to suit 2+2 pulsation, 4+0 pulsation or 2+2 x 2 (one pulsator per two milking points) with mounting options for 50mm, 63mm or 76mm pipes.

Large sight glasses with built in filters make it simple to identify a dirty pulsator. The filter can be easily accessed and cleaned as needed.

- Glass reinforced plastic and geometrically rigid design ensures accurate, long-lasting performance.
- Large air flow design enables exact, consistent performance across all pulsators.
- Maintenance is a breeze due to the simple assembly.
- Configurations to suit every machine type and budget.
- 100% designed and manufactured in New Zealand.
